002  .NOTES
003    File Name:  Create-PSListingGUI.ps1
004    Version:   1.0 - 03/14/2024
005    Author:    Randy Turner
006    Email:     turner.randy21@yahoo.com
007    Created:   03/14/2024
008    History:
009      V1.0 - 03/14/2024 - Original Release
010
011  .SYNOPSIS
012    This script provides a GUI front-end for my Create-PSListing.ps1 V2.0+ script
013    to allow it to be called in a prompted manner.
014
015  .DESCRIPTION
016    Calls the Create-PSListing V2.0+ script in a prompted manner or displays diagnostics.
017    Create-PSListing.ps1 V2.0 added direct support for a Powershell Token report similar
018    to a cross-reference in other programming languages.  Most of the dialog settings may be
019    saved on exit to a Create-PSListingGUI.json when the associated checkbox has been checked
020    and the dialog is exited by use of the Ok button, unless the Diagnostic checkbox is checked.
021    The input file, Save-On Exit, Diagnostic, & Token Report Only values are NOT saved.
022    Due to what appears to be a scope issue, when run in Powershell Core 6+ an
023    Add-Type -AssemblyName System.Windows.Forms must be performed first.
024
025    ---------------------------[Special Note]------------------------
026  You may register this in your VSCode_profile using:
027  Register-EditorCommand -Name 'BlueflameDynamics.Build-PSListing' `
028  -DisplayName 'Create PS Listing' `
029  -ScriptBlock {.\Create-PSListingGUI.ps1} -SuppressOutput
030    ---------------------------------------------------------------------
031
032    --------------------------------------------------------------------------------
033  Security Note: This is an unsigned script, Powershell security may require you run the
034  Unblock-File cmdlet with the Fully qualified filename before you can run this script,
035  assuming PowerShell security is set to RemoteSigned.
036    --------------------------------------------------------------------------------
037
038  .PARAMETER Path
039    Fully Qualified Input Script Name.
040  .PARAMETER StartPosition
041    Dialog StartPosition of CenterParent, CenterScreen (Default), CenterTop (Center screen, Top of ISE
042    or Point. When Point is selected two dynamic parameters X & Y become available. These
043    parameters are the X,Y coordinates for the onscreen dialog.
044  .EXAMPLE
045    PS> .\Create-PSListingGUI.ps1
046    Runs this script displaying the GUI interface for Create-PSListing.ps1 V2.0+
047  .EXAMPLE
048    PS> .\Create-PSListingGUI.ps1 -StartPosition Point -X 250 -Y 97
049    Runs this script displaying the GUI Dialog at screen point: 250,97
050  .EXAMPLE
051    PS> '.\AES-Email.ps1'|.\Create-PSListingGUI.ps1 -StartPosition Point -X 250 -Y 97
052    Runs this script displaying the GUI Dialog at screen point: 250,97 with the named input file.
